FOR IMMEDIATE RELEASE: March 5, 2007

UPDATES ON SALEM COUNTY ROAD CONSTRUCTION PROJECTS

(SALEM, NJ)—Freeholder Bruce Bobbitt, Chairman of the Public Works Committee, today announced updates on plans for Salem County road projects throughout the county.

"There are a number of road construction projects in queue for Salem County," said Freeholder Bobbitt. "Since spring is just about upon us, we are preparing to launch our road projects to ensure that we remain proactive in maintaining and improving our county roadways."

Pipe-work has started on Buck Road (CR-553) from Willow Grove Road (CR-639) to the Gloucester County line. Phase II, resurfacing will start on or about March 10th. Around the same time the necessary pipe-work will be done on Glassboro Road (CR-619) from Route 40 to the Gloucester County line. The pipe-work will last about two weeks then resurfacing will start on or about March 24th.

On or about April 7th, the resurfacing of Garden Road (CR-674) from Porchtown Road (CR-613) to 6-Points Intersection will begin.

"There will be sporadic road closures as we proceed with these construction projects," said Freeholder Bobbitt. "We will keep the public abreast of any changes in the situation so that they will not be faced with unexpected circumstances in their daily commute. As always, the roads will be open to residents and emergency vehicles."

The contractor on these projects is South State Inc. of Bridgeton, N.J. Should anyone have questions, please call Bill Sumiel at the Salem County Engineers Office (856) 935-7510 extension 8549.
